Divya Kumari

Bengaluru, India | divyakumari.cse@gmail.com | linkedin.com/in/divya-kumari5xxx2t95 | github.com/Divya2007-hub | Portfolio

Education

AMC Engineering College, Visvesvaraya Technological University (VTU) — Bengaluru, India
Bachelor of Engineering in Computer Science & Engineering — *Aug 2024 – Present*
- Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Linear Algebra, Discrete Mathematics, Operating Systems

St. Joseph International School — Jhalawar, Rajasthan, India
Pre-University Education (Class XII) — *2021 – 2023*

Doon Public School — Begusarai, India
Secondary School Leaving Certificate (Class X) — *2014 – 2021*

Technical Skills

Languages: Python, Java, JavaScript (ES6+), TypeScript
Frontend: React, Next.js, HTML5, CSS3, Tailwind CSS, Responsive Web Design
Backend & Database: Node.js, REST APIs, PostgreSQL, Prisma ORM, Authentication & Authorization
Tools & Platforms: Git, GitHub, Vercel, Neon PostgreSQL, VS Code
Concepts: Data Structures & Algorithms, Object-Oriented Programming, Full-Stack Web Development, Database Design, CRUD Operations, API Integration, Cloud Deployment, Problem Solving

Projects

NEXA | *JavaScript, HTML5, CSS3, PWA, AI Integration* | GitHub — 2026
- Built an AI-powered productivity web application with task management, focus mode, smart reminders, and streak tracking, improving simulated user workflow efficiency
- Implemented Progressive Web App (PWA) support enabling cross-device installation and offline functionality, broadening accessibility across platforms
- Integrated AI-based productivity suggestion engine that analyzes user behavior patterns to provide personalized workflow recommendations
- Designed and built a fully responsive UI following mobile-first principles, ensuring consistent UX across all screen sizes

TrustNet | *JavaScript, Encryption Algorithms, Network Concepts* | GitHub — 2026
- Developed a secure peer-to-peer networking system implementing trust verification protocols between nodes using encryption and authentication principles
- Applied symmetric/asymmetric encryption concepts for secure communication channels, demonstrating understanding of cryptographic fundamentals
- Built an interactive visualization dashboard to display real-time trust scores and connection graphs between network nodes

CollegeCompass | *Next.js, TypeScript, PostgreSQL, Prisma, Neon, Vercel* | GitHub — 2026
- Built a full-stack college discovery and comparison platform enabling students to explore 25+ Indian colleges and 85+ academic programs through advanced search and filtering
- Designed and managed a relational PostgreSQL database using Prisma ORM, storing 136+ structured records across colleges, courses, reviews, and user entities
- Implemented authentication, saved-college functionality, and dynamic data-driven pages using Next.js and TypeScript, improving user engagement and personalization
- Deployed the application on Vercel with Neon PostgreSQL cloud infrastructure, ensuring scalable access and seamless user experience across devices

Hackathons

HACTOPUS | *Participant* | *10 May 2025*
HackZion AMCEC v3 | *Participant* | *9th & 10th April 2026*
Epoch'26 Hackathon | *Participant* | *1st & 2nd May 2026*

Certifications

Deloitte Australia – Technology Job Simulation | *Forage* | Credential
Career Essentials in Generative AI | *Microsoft & LinkedIn* | Credential
Learn Java Programming: Beginner to Master | *Udemy* | Credential
Basic Linear Algebra | *NPTEL – IIT Madras* | Credential
Gemini in Google Docs | *Google Cloud & Simplilearn* | Credential

Experience

Software Developer – AI & Frontend 2024 – Present

Independent GitHub Projects *Bengaluru, India*

- Designed, developed, and deployed 3+ end-to-end web applications independently, managing full project lifecycle from ideation to production on Vercel with GitHub-based CI/CD workflows
- Applied AI fundamentals to integrate intelligent features (task prioritization, behavioral analytics, productivity suggestions) into user-facing applications used across devices
- Built accessible, responsive frontends using HTML, CSS, and JavaScript following modern web standards; established iterative development practices across all projects

Freelance & Open Source Developer 2024 – Present

Academic & Personal Projects *India*

- Developed Python utilities and automation scripts for problem solving; practiced algorithmic thinking and data structure application across academic challenges
- Maintained structured Git repositories with descriptive commit histories and branching strategies, simulating professional version control and collaboration workflows
